

Managed Virtual WAN Powered by Aruba EdgeConnect

A Secure, Low-Latency, and Cost-Saving Solution

Vandis' offering combines Azure Virtual WAN, Aruba EdgeConnect SD-WAN and Vandis Managed Services to improve performance and connectivity between branch sites, your Azure environment, and the internet.

Managed Virtual WAN Powered by Aruba EdgeConnect

Vandis engineers will design and implement an Aruba EdgeConnect SD-WAN offering that will prioritize your traffic based on the needs of your organization. This solution will allow you to leverage your available connections, including Azure Virtual WAN, to provide the fastest, most reliable path to your end users. Vandis' Managed Services provides remote support and 24/7 monitoring for ongoing optimizations.

Why customers use Managed Virtual WAN Powered by Aruba EdgeConnect.

- Reduce or eliminate high MPLS costs across branch sites
- Lower end-user latency
- Faster VPN connectivity
- Single pane of glass for network visibility of premise and Azure environments

Prioritize Traffic Based on Organizational Needs

- Optimize traffic for your critical applications with custom SLAs
- Leverage intelligent application classification along with packet marking, queuing, and shaping to prioritize the most important traffic

Decrease latency across your critical workloads

Low Latency Mesh Communication Fabric

- Optimized SD-WAN
- Full Network & Endpoint visibility
- Run your organization on one of the largest network backbones in the world

Improve visibility with an Enterprise SD-WAN deployment

Vandis Managed Services and Ongoing Support

- Secure deployment of Aruba Orchestrator
- Expertise managing complex, enterprise networks
- 24/7 Monitoring & Support
- Third Party security integration

Customized managed services for ongoing optimizations

"The Aruba EdgeConnect integration enables our joint customers to easily and securely enable direct and local Internet connectivity for key Office 365 experiences across enterprise branches,"

-Bill Baer, Senior Product Marketing Manager, Office 365 at Microsoft

How Vandis' Managed Virtual WAN Powered by Aruba EdgeConnect works to benefit your business

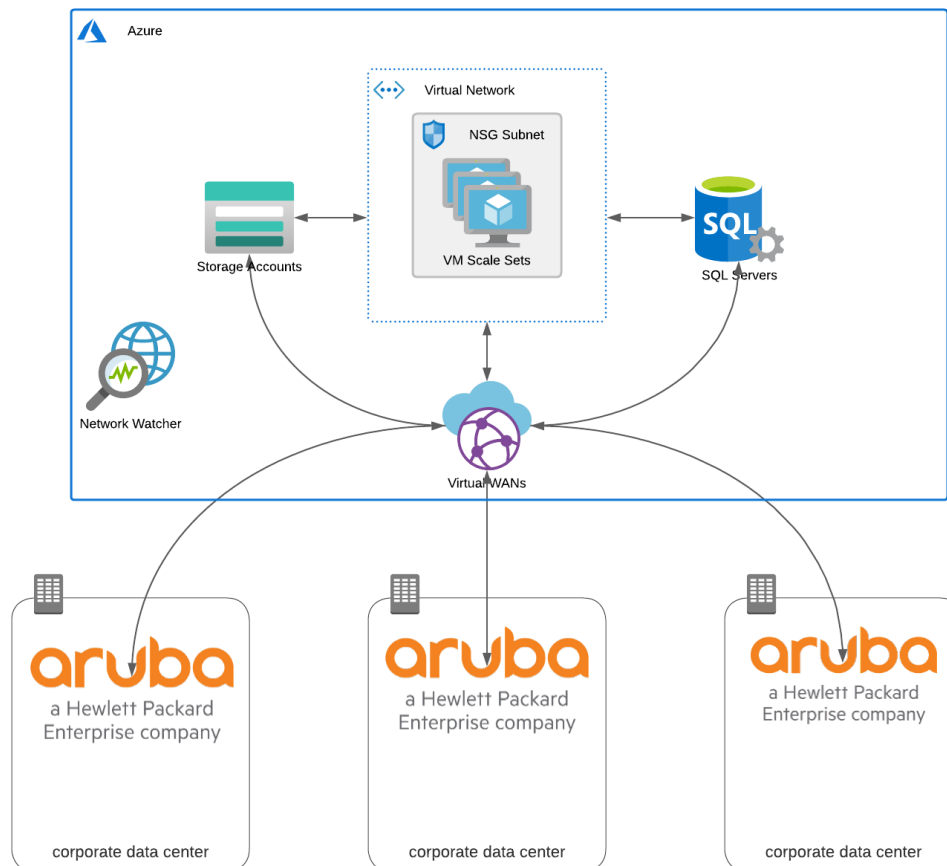

- Cost savings compared to traditional network environment
- Accelerated cloud adoption for organizations using this solution
- Better visibility throughout your hybrid environment
- Simple control of RBAC and permissions through Azure Lighthouse
- A true managed hybrid cloud network model

Managed Virtual WAN Powered by Aruba EdgeConnect

Our promise to you

That we will build and monitor your SD- WAN environment, customized to your business needs.

Why Vandis?

A comprehensive network and security strategy that spans your cloud and premise environments has become mission critical for every organization. Vandis' high-level engineering capabilities and close relationships with market leading and niche manufacturers allow us to make timely recommendations. With over 38 years of experience, Vandis has the proven ability to navigate the everchanging technology and business landscape. As projects increase in complexity, we have the necessary resources to successfully manage projects on a regional, national, and global scale.
