

User Orchestration: Onboarding and Offboarding Employees

Reduce complexity and increase security throughout your employee lifecycle management

Common Challenges for Employee Onboarding and Offboarding

The process of onboarding or offboarding employees is often time-consuming, involving the coordination of numerous teams to properly establish the correct access rights. Taking these steps can decrease security and compliance risks and accelerate time to impact of new hires.

Vandis User Orchestration Solution

Vandis' offering will build automation and orchestration into your employee lifecycle management process. Our team will leverage existing templates as the foundation to build custom connections into your back-office tools and security solutions to streamline and automate what is currently a manual process.

Greatly Reduce Security Risks

- Automate data and access per employee as changes occur
- Ensure access is terminated upon employee departure
- Adhere to corporate policies and legal or industry regulations

Consistent security and policy enforcement

Integrate With Your Existing Application Stack

- IT Asset Manager
- Active Directory
- Asset Discovery
- Network Access Control

Unify processes across toolsets

Significantly Reduce Manual Processes

- Remove complexity from employee lifecycle
- Define user types and roles for automated access rights
- Continuous discovery and automation as changes occur

Free up your team to focus on business objectives

Why customers use Vandis' User Orchestration Solution:
